

We strive to empower, strengthen, and educate youth, children, and families in a safe environment that encourages participation in S.T.E.A.M. Infused Learning Labs, Wellness, Academics, and Family Support.

Dismantling Barriers for Minority Students

THE PROBLEM: Many underrepresented and underserved students lack resources and do not have access to enrichment activities such as STEM, recreation, and wellness. These opportunity gaps create an academic divide that can impact upward mobility later in life.

Low-income students are substantially underrepresented in STEM.

Research indicates low-income students are entering STEM programs at a much lower rate than their high-income counterparts.

THE SOLUTION: To provide STEAM Education, Private Tutoring, Mental Health & Entrepreneurship Services to minority students that are underserved and underrepresented.
